Fill in your hostname and select your provider from the list

This could also be called 'Domain', 'SIP server', 'Registrar' or 'SIP Proxy'. For example 'sip.example.com' or '123.21.123.32:5060'

Back Next

Hostname

This could also be called 'Domain', 'SIP server', 'Registrar' or 'SIP Proxy'. For example 'sip.example.com' or '123.21.123.32:5060'.

You can also just search for the name of your provider, maybe we know the settings. If not – you'll be able to set it up manually.

HOSTNAME хэсэгт si.itpartner.mn хаягийг оруулаад Next товчийг дарна.

Optional
Authentication and
Outbound proxy

Authentication username

Outbound proxy

*If your VoIP provider or office PBX does not require these additional settings click '**Skip**' to continue

Back **Skip**

Authentication username

Not sure if you need this? Ask your VoIP provider or system administrator about the requirements for your office PBX.

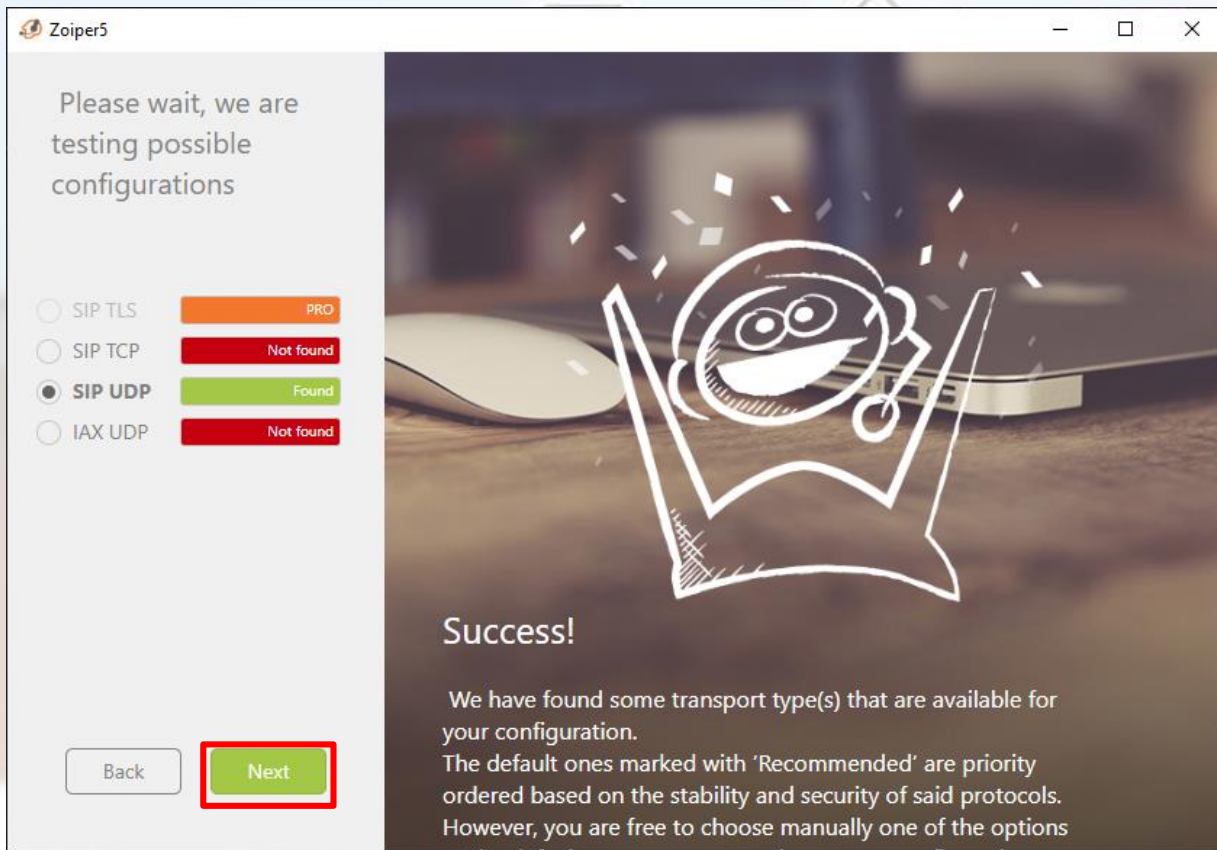

Outbound proxy

This is typically not required. However, in some special environments it is needed for network access.

Skip товчийг дарна
